Loft Spaces To Be Built at Park Place

Kansas City, Mo.—Axis Lofts is scheduled to open in fall 2008 at Park Place, the first mixed-use destination of its kind in Johnson County. Comprising 26 lofts in a four-story building over underground parking, Axis Lofts will add an urban flair to suburban Leawood. It will be next to Barkley Square, the main active public space at Park Place, where residents can walk to shops, eateries and entertainment. All residences will also overlook the Meadow, a green space with trees, flowers and walking paths. The Park Place team includes developers Jeff Alpert and Melanie Mann, general contractor Walton Construction Company LLC and designer Humphreys & Partners Architects LP, based in Dallas. Park Place retailers include Morton's Steakhouse and California Pizza Kitchen. The project will also include two hotels and offices above retail spaces.
